EXERCISE - 5

Question

Execute and display the results of the following commands in Kali Linux Operating System:

i) uptime
ii) date
iii) mv

Aim

To execute and display the results of the uptime, date, and mv commands in Kali Linux.

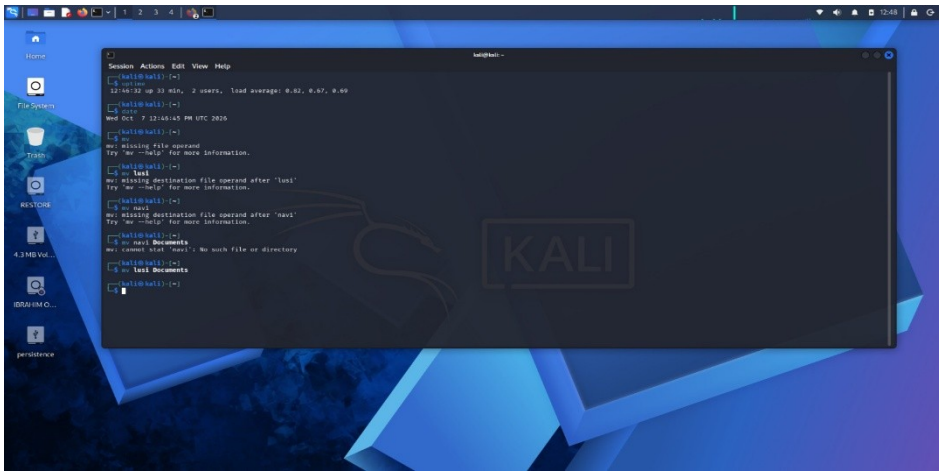

i. UPTIME COMMAND

Command:

uptime

Use:

The uptime command shows how long the system has been running, the number of logged-in users, and the system load averages.

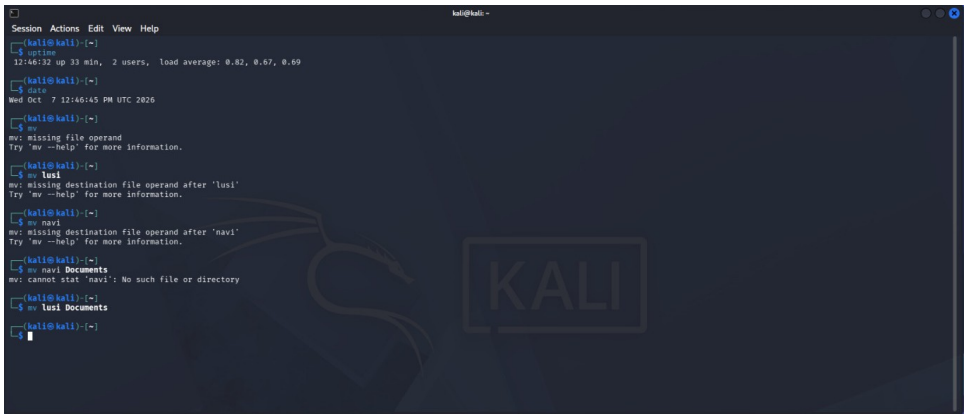

ii. DATE COMMAND

Command:

date

Use:

The date command displays the current system date and time.

iii. MV COMMAND

Command:

mv lusi Documents

Use:

The mv command moves or renames files and directories. Here, the directory 'lusi' is moved into the Documents folder.
