# EXERCISE - 6

**Question**

Execute and display the results of the following commands in Kali Linux Operating System:

i) touch
ii) pwd
iii) wget

**Aim**

To execute and display the results of the touch, pwd, and wget commands in Kali Linux.

### i. TOUCH COMMAND

**Command:**

touch navi

**Use:**

The touch command creates a new, empty file if it does not exist, or updates the access/modification timestamp of an existing file.

### ii. PWD COMMAND

**Command:**

pwd

**Use:**

The pwd (print working directory) command displays the full path of the current directory.

### iii. WGET COMMAND

**Command:**

wget https://simats-mentees.onrender.com

**Use:**

The wget command downloads files from the web over HTTP, HTTPS, or FTP. The screenshot shows an attempt against a non-existent host (resolution failure) followed by a successful connection to a live host.
